ZX310STe
Short throw laser projection

- **Bright XGA laser projector – 3500 ANSI lumens**
- **Short throw lens - 100" image from just over a metre away**
- **20,000 hours maintenance-free laser light source at full brightness****
- **Crestron RoomView® – RJ45 control and monitoring**

Powered by long-lasting, low maintenance laser light source, the ZX310ST is perfect for businesses, schools and colleges. The lamp-less design vastly reduces running costs for a low total cost of ownership. And with a throw ratio of 0.62:1 it means you can project a 100" image from just over a metre away. Having the projector installed so close to the screen avoids any shadows being cast across the screen from the presenter(s).

It provides a complete package with many new features, including two HDMI inputs, RJ45 and a powerful 10W built-in speaker in a compact chassis.

It also supports 24/7 operation and versatile orientation, which makes it suitable for vertical applications such as signage solutions in shop windows or retail displays where space or accessibility can be limited.
